

GLORY PT. II

You are such a thing of the morning  
You are such a sign of the dawn

LANDSCAPE

Everything he says is a decoration a promise in the skyline  
A guided grotesque guiding your eyes away  
Where do you feel in control when you're not alone?  
Where do you feel in control when you're not alone?

Ash tray's been filling up too fast lately, but where can you go?  
When you see him in your rear view mirror, why would you  
leave home?  
Where can you go when you're not alone?  
Where do you feel in control when you're not alone?

It's hard to say so I'll leave it behind  
It hurts to say it so I'll leave it behind me  
I will drive away I will leave him in the landscape

Just part of the landscape  
Just part of what was

GOODBYE

There's a blood spill kit on the wall of the store  
99 uses in it still  
I'm with it in the corner  
And I'm really making myself ill

Cuz I think I did everything I could've done  
Tried to talk it out, to show you how  
I'm always in your corner  
But I can't make another sound

Even if you don't believe me  
I do, I do  
Even if I don't believe me  
I do, I do  
I always will

It feels like grinding rust under our feet  
It feels like gauze wraps and electricity  
I was too used to not telling anyone  
I did not have your certainty

So I'll hang out by the defibrillator and  
Watch the door  
I'm always in your corner

Even if you don't believe me  
I do, I do  
Even if I don't believe me  
I do, I do  
This is not a promise but  
I always will

It feels like the golden gate bridge and its rust  
Red in the fog, standing too tall to be swayed  
I wanna stay but the wind and water pull me both ways

Even if you don't believe me  
I do, I do  
Even if I don't believe me  
I do, I do  
I always will  
Even if you don't believe me  
I do, I do  
Even if I don't believe me  
I do, I do  
You matter so much  
So I'll show up  
I always will

## NO RIVERS

Taxes taxes  
Painting a face with care  
Mugs and glasses  
Playing a game that is never fair

On the soul  
Using the lightest touch  
Drink it whole  
Tilting the world too much

This place is full of silt  
No rivers come this way  
Keep going on  
On until break of day

Doing chores  
Just enough to convince  
When you lose it  
When your fingers slip

How she shows  
After the sudden hand  
Fills the holes  
Porcelain to sand

This place is full of silt  
No rivers come this ways  
Keep going on  
On until break of day

To you and yours  
I found you upstairs  
Crying for oars, hand on your wrist  
Standing there

I took you into the kitchen  
And dressed you warm  
Told you of the snow  
And where it goes

Dirt is all there is  
No rivers come this way  
Go on  
Go on  
No rivers come  
No rivers come, no!

Dirt is all there is  
No rivers come this way  
Go on with your wood  
And bring the waves

## LORD OF DARKNESS

Just one touch, all the bricks will break in place  
Pray for no wind. Dust kicks this undeveloped land

I found a flashlight in the middle of the tunnel  
It was on. Had it been left?  
Curses and blessings sweat thru my dress  
Have I been left?

I found that flashlight in the middle of the tunnel and  
It was on, and I have been left  
Cuz it was nothing or the sun  
I wanted him to go chest to chest with me and yet I was the one who  
Kept going underground

But the Lord Of Darkness shows his kindness  
By pressing to your sternum  
What you thought you didn't need

The Lord Of Darkness shows his kindness  
By pressing to your chest oh  
The Lord Of Darkness shows his kindness  
By pressing through your sternum saying

More weight  
I give you strength for more weight  
I give you strength for more weight  
I give you strength for more weight  
And more and more and more

I give you strength for more people  
I give you strength for more children  
I give you what was always yours  
I give you atmosphere  
I give you strength of thousands!
